PARTNERSHIP PROPOSAL

Earn 50% on Every Client You Refer

Date: 23 October 2026 · **Prepared for:** _____
Prepared by: LogBase

01 The opportunity

You already do the hard part: you find the products your clients need and put them in their hands. Every one of those clients then faces the same question, which is how to keep track of what they bought, what they sold, what is left on the shelf and who still owes them money.

You introduce, we serve, you get paid every month the client stays.

LogBase answers that question, and under this proposal you earn **50% of every payment** each client you introduce makes to LogBase, for as long as they keep paying.

02 What LogBase is

LogBase is an online system for recording and understanding a business: its products and stock, purchases from suppliers, sales, customers, expenses and staff. It runs in any browser and installs on a phone like an app, and it is live now at **mylogbase.com**.

It is priced in naira, takes payment through Paystack, and shapes its menus around the kind of business using it. A phone and gadget shop, a general retail shop, a laundromat and a repair workshop each get the pages they actually use, not a generic accounting tool they have to bend into shape.

Every new business starts with a **14-day free trial of the full Business plan**, so your client sees the whole product working on their own records before paying anything.

03 What your clients get

For a business that buys and sells stock, LogBase covers the whole loop:

- **Stock that is always up to date.** Products with variants and categories, with every sale, purchase, return and adjustment updating the count automatically.

- **Purchases and suppliers.** Record what was bought, from whom, at what cost, and what is still owed to each supplier.
- **Fast sales and receipts.** Record a sale in seconds, take full, part or credit payments, and share a clean receipt. Sales can be recorded on a phone even when the connection drops, and are sent when it returns.
- **Customers and credit.** See who owes what, and collect it.
- **IMEI and serial tracking** for phone and gadget businesses, plus swaps and trade-ins, returns and repairs.
- **Several stores, one business.** Each store keeps its own stock, sales and records, and stock moves between stores through transfers.
- **Staff with limits.** The owner decides what each staff member can see and do, and can require approval for sensitive actions.
- **Clear numbers.** Sales, expenses and profit in one place, with an activity log on the Business plan showing who did what.

Owners stop guessing. They know what to reorder, what is not moving and where the money went, and that is exactly the conversation you are already having with them.

04 The offer: 50% of every payment

For every business that signs up with your referral code, **you receive 50% of every plan payment it makes to LogBase**: the first payment, every monthly renewal, every yearly payment, and every plan upgrade.

- **Half, not a token fee.** It is 50% of the amount the client pays, calculated on each payment.
- **No cap and no expiry.** There is no limit on the number of clients or on how long you earn. As long as a client keeps paying, you keep earning.
- **Recurring by design.** One introduction can pay you for years.
- **Nothing to buy, stock or support.** We run the product, the billing and the support. You make introductions.

The only payments that do not earn a share are the free trial and plan time we give a business for free, because no money changes hands.

05 What you could earn

A single Business-plan client on monthly billing pays you ₦2,500 every month. These are LogBase's current prices, and your share is half of each one:

Client's plan	Client pays	You earn (50%)
Starter, monthly	₦2,000	**₦1,000**
Starter, yearly	₦20,000	**₦10,000**
Business, monthly	₦5,000	**₦2,500**
Business, yearly	₦50,000	**₦25,000**

It adds up quickly, because clients stay and renew. This is what a book of 300 or more paying clients on monthly billing earns you, assuming 6 in 10 choose Starter and 4 in 10 choose Business:

Paying clients	You earn each month	You earn each year
300	**₦480,000**	**₦5,760,000**
500	**₦800,000**	**₦9,600,000**
1,000	**₦1,600,000**	**₦19,200,000**
2,000	**₦3,200,000**	**₦38,400,000**

These figures show the arithmetic of the offer, not a promise of how many clients will sign up or stay. They also do not count the free-trial period, which earns nothing for anyone. The point is that one client who stays is income you did nothing further to earn.

06 How it works

1. **You get your referral code.** We create a personal code for your company, such as `ABC1234`, and a ready-made sign-up link that carries it.
2. **Your client signs up.** They open your link, or type your code in the optional "Referral code" box on the sign-up page. They start their 14-day free trial and the business is permanently tied to you.
3. **Your client pays.** When they choose Starter or Business and pay through Paystack, 50% of that payment is recorded as yours automatically. The same happens on every renewal.
4. **You get paid.** We send you what you have earned, and mark it as paid in your dashboard so both sides always agree on the numbers.

There is no form to fill in per client and nothing to claim by hand. The code does the tracking.

07 Your own referral dashboard

You do not have to take our word for the numbers. Your company gets a LogBase login, and a **Referrals** page appears in your menu, visible only to you. It shows:

- Your referral code and sign-up link, with one-click copy buttons.
- How many businesses you have referred, and how many are paying.
- Every payment that earned you money: the date, the business, the plan, what they paid and your 50% share.
- What is waiting to be paid to you, and what has already been paid.
- A history of every payout we have sent you, with its date and note.

You see the referred businesses by name, when they signed up and which plan they are on. Their private details, such as email addresses and business records, stay private to them.

08 Why this fits your business

You are trusted by clients who are already buying stock. That is the moment a business owner is most open to running things properly, and you are in the room for it.

- **It costs you nothing.** There is no fee to join, no stock to hold, no software to host and no support desk to staff.
- **It makes your service stickier.** A client who runs their stock and sales on LogBase sees their own numbers and knows what to reorder, which is a natural reason to keep sourcing through you.
- **It is income that repeats.** Product sourcing earns when an order happens. A referral earns every month the client keeps using LogBase.
- **It is easy to say.** "Try this free for 14 days" is a small ask, and the client risks nothing.
- **You stay in control of your name.** You choose which clients to introduce, and we serve them directly and well.

09 Terms in plain language

These are the terms we propose. Anything here can be discussed before we both sign.

- **Your share.** 50% of the amount each referred business pays LogBase for a paid plan, on every payment: first payment, renewals, yearly payments and upgrades.
- **How a client is linked to you.** A business is yours when it signs up using your code or your link. This is recorded at sign-up and does not expire.
- **How long you earn.** For as long as that business keeps paying for a plan.

- **What does not earn.** Free-trial time, the Free plan, and plan time LogBase gives away without payment. A business that already had a LogBase account before your code cannot be moved under it.
- **Your own account.** Your company cannot use its own code to refer itself.
- **Payouts.** Proposed: earnings are paid to your company's bank account by transfer once a month. Each payout is recorded in your dashboard, so the amount owed always matches what we have paid.
- **Changes.** The 50% share is fixed for the payments covered here. If we ever offer a different share, it applies only to payments made after we both agree it, and never reduces what you have already earned.
- **Ending the arrangement.** Either side can end it with written notice. You keep earning your share on the businesses already referred, for as long as they keep paying.
- **Customer ownership.** The referred businesses are LogBase customers. You are free to keep serving them as your own clients for product sourcing, and nothing in this arrangement restricts that.

10 Next steps

We can have your code live the same day you say yes.

1. **Say yes.** Reply to this proposal or message us, and we will confirm the terms in writing.
2. **We set you up.** We create your referral code and your Referrals page, and send your sign-up link.
3. **You introduce your first client.** Share the link with one client this week and watch the sign-up appear in your dashboard.
4. **You start earning** the moment that client makes its first paid-plan payment.

We would like your first client on LogBase before the end of this month, so you can see the numbers for yourself rather than just read them here.
